DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klein (5479411) in view of Sit et al (6349336).

As per claims 1,7,8,13,14,22,26,28,32,34,39,42, Klein (5479411) teaches an email notification system comprising:

“an email server.....stored” as email network (col. 4 lines 20-25)

“an email notification.....email message” as retrieving email in a convention email system (col. 4 lines 20-25)

“a header extraction process.....email” as extracting header email info (col. 2 lines 40-50)

“a text to speech converter....information.....voicemail message” as converting the header email and delivered a voice mail message (col. 2 lines 20-40);

Art Unit: 2655

“wherein the voicemail server includes a process to notify the subscriber of the voicemail message” as teaching notifying the subscriber of the voicemail message containing the converted header information (col. 6 lines 1-22)

Klein (5479411) does not explicitly teach the details of the polling process, however, Sit et al (6349336) teaches the communication protocols involving email servers, especially with automatic polling (col. 4 lines 45-60). Therefore, it would have been obvious to one of ordinary skill in the art of email communications to automatically periodically poll an email server because it would advantageously allow for updating and monitoring the performance of the server (Sit et al (6349336) col. 4 lines 55-60).

As per claims 2,9,13,14,26,35, 40,41, Klein (5479411) teaches notifying the subscriber of the voicemail message containing the converted header information (col. 6 lines 1-22)

As per claims 3,5,6,11,12,15,17,25,31,36,38,43,44, Klein (5479411) teaches control protocols (col. 3 lines 46-67)

As per claims 4,10,16,23,24,29,30,37,45, Klein (5479411) teaches multiple email accounts and servers (col. 4 lines 20-31)

Art Unit: 2655

As per claims 18-20, Klein (5479411) teaches contact information (col. 4 lines 2-19; and col. 5 lines 1-24)

As per claims 21,27,33,46, Klein (5479411) teaches email information can include other types of media (col. 6 lines 27-50)

Response to Arguments

3. Applicant's arguments filed 9/3/2003 have been fully considered but they are not persuasive. As per applicant's arguments that the 'Examiner admitted that Klein does not explicitly does not explicitly teach the polling process', examiner disagrees and points that the Office Action says "Klein does not explicitly teach the details of the polling process". As per applicant's arguments that the purpose of polling the email server in Sit is not to check if there are new email message, examiner argues that the applicant is arguing the specification, and not the scope of the claim language. Examiner notes that the scope of the claim language pertains to 'polling to obtain a message'. As per the arguments that it would not have been obvious to combine the Sit and Klein references, examiner argues that the reason to combine the Sit reference with Klein is to provide a way to better monitor the server (Sit et al (6349336) col. 4 lines 55-60). As per applicant's arguments that the notification system of Klein is not an active operation, examiner argues that the applicant is arguing the specification, and not the scope of the claim language.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
